

## REMTECH EXPO INTERNATIONAL ACTIVITIES AND OPPORTUNITIES

**RemTech Expo has always been synonymous with international activities and opportunities** for companies that want to get in touch and strengthen relationships and targeted collaborations and be part of an integrated and strategic system that evidently represents a fundamental competitive tool.

Last October, RemTech Expo was at the **Dubai** Chamber with the Emilia Romagna Region and a prestigious business delegation. In November, at the Technology Summit in **Delhi** in India, together with a pool of companies, it signed an important collaboration agreement with the CII, the Indian Confederation of Industry. In the same month, in **Baku**, Azerbaijan, with ITA, Ispra and a group of specialized environmental companies, it built the foundations for the signing of a Memorandum of Understanding with the Caspian Ecology event, which was signed this year. In February, it was the only national interlocutor in the water workshop planned by the **South African** Consulate, while in April, in Ferrara, it received the South African institutional delegation involved in the planning of the Ministry of the Environment, with Arpae and some companies of the remtech-expo-community. It was then in **Cairo** in Egypt and shortly it will be in **Beijing** in China, guest of the Italian Pavilion wanted by the Ministry of the Environment in CIEPEC.

The project, developed in collaboration with the Italian Trade Agency **ITA** and the **Emilia-Romagna Region**, is deliberately designed to approach and penetrate complex foreign markets, related to the target Countries, **Algeria, Azerbaijan, Brazil, China, United Arab Emirates, Egypt, India, Morocco, South Africa, Tunisia**.

**In September, from the 18th to the 20th, the delegations composed of public and private players, selected and involved in the process started in the target countries by RemTech Expo, will be in Ferrara to meet the attending public and private companies.**

The companies, within the organization of an articulated agenda and bilateral meetings, will be able not only to know some of the main foreign public and private interlocutors, but also to better understand the legislation, collect useful information, know the participation requirements to the main tenders in the target Countries and to identify the possible partners to start relationships and new projects with.

To our Companies the best wishes for a very Good Job!
