The program of the 13th edition of RemTech Expo is enriched by new drivers related to the Circular Economy, sustainable works and reuse of materials. The experts spoke at the meeting of the Technical Scientific Committee of RIGENERACITY!

RemTech Expo is enriched by moments of wide sharing of knowledge, know-how, excellence and opportunities for growth and business and it does so through the thematic segment of the RigeneraCity event.

On 4 March, the Technical Committee of the RigeneraCity thematic segment was convened at the headquarters of Acer Azienda Casa Emilia-Romagna of Ferrara, with the coordination of the Director of Acer Ferrara **Diego Carrara** and the co-management of Prof. **Romeo Farinella** of the University of Ferrara.

At the RigeneraCity table, the Snpa, Ispra, the Emilia-Romagna Region, Federcasa, Audis, Oice, Nomisma, the University of Ferrara and Acer Emilia Romagna met. And it will be the Emilia Romagna Region to be the protagonist at RigeneraCity 2019 through the excellent projects awarded by the Call for the regeneration of urban spaces, reuse of the existing building heritage and zero land consumption promoted with the aim of supporting measures to support strategies urban and territorial regeneration aimed at guiding practices and methods of intervention for urban quality and environmental sustainability.

Consumption of Soil, "Living in Risk", Housing Policies, Social Housing, Circular Economy and of course **Urban Regeneration** will be some of the drivers of the next edition.

Excellent cases of redevelopment in Italy will lead to international comparison.

There will also be good practices with the representation of successful national and international cases relating to the public and private sectors, narrated directly by the protagonists, research projects, technological innovations and articulations that will be presented in the context of the lecture conferences dedicated to the knowledge of the subsoil and of the **General States of Land Engineering**.

The panel of activities is crowned by the Awards dedicated to virtuous projects and excellences with prizes and special mentions in the logic of an inclusive and rewarding program that aims to enhance and above all to replicate best practices.

"After the positive experience of 2018 - announces Marco Marcatili of Nomisma - we are already ready for the next edition. The most eloquent news will be that, after the positive experience of the call, the Emilia Romagna Region is a candidate to become the Capital of Urban Regeneration and RigeneraCity the place where you can touch practical examples and excellent and where you can articulate agreements and protocols to develop projects and programs to be launched in the coming years". Marina Dragotto di Audis reiterates that "Urban regeneration must obviously concern three areas: the built, the environment and the social sector, with an increasingly important role of the latter as a guide to choices in this area". "One of the many opportunities that RemTech Expo and Rigeneracity offer us - concludes Romeo Farinella of the University of Ferrara - is to build international comparison tables with the aim of living in an increasingly sustainable world. In fact, sustainability is won on a global level and to be protagonists it is necessary to participate in policies and projects that are developing all over the world. Not just Italy or Europe but cooperation with realities such as Africa, Asia and America. This will become one of the strengths for the debate we are going to develop within RigeneraCity. "

The day closes with the full consent of the participants, the purpose of growth and the launch of immediate actions aimed to build a proactive panel, expanding the players to the comparison table in the logic of inclusion and sharing, focal characteristics of **circular development and territorial and social progress**.
