REMTECH EXPO 2020

September, 23-25 Ferrara (Italy)

CHEMTECH 2020, REMTECH EXPO, THE NEWS OF NEXT EDITION

www.remtechexpo.com

The agenda of the 14th edition of RemTech Expo is enriched by new and focal themes related to industrial development, technologies, innovation, research, circular economy, sustainability, communication, social acceptability. The experts talked about that at the meeting of the Technical Scientific Committee of CHEMTECH.

On March 5th at the headquarter of Ispra in Rome and by videoconference, the Technical Scientific Committee of ChemTech met with the coordination of Eng. **Alfredo Pini**, Environmental Education and Training Service and technical coordination of management activities in Ispra, supported by **Marco Ravazzolo** of Confindustria.

The meeting was animated by some of the leading experts and representatives of the Institutions, Associations, Universities, Ispra, Confindustria, Federchimica, Unione Petrolifera, Plastics Europe, Assobioplastiche, Polytechnic of Milan, Aster Emilia-Romagna Region, National Federation of Chemists and Physicists and excellent companies as Versalis, Nextchem, Sasol, Ecozinder.

The Scientific Coordinator opens the meeting with a short summary and, with satisfaction, shares the excellent results achieved in the 2019 edition. Large and qualified the participation to the conferences with wide involvement and comparison between the public and private parties. The goal for the next September is not only to replicate the excellent results but of course to overcome the successes achieved.

Wide comparison between all the participants and it will continue in the coming months to complete in detail the agenda of the appointments. Among the main innovations that are introduced in the agenda of the 2020 edition of ChemTech, highlight topics such as, industrial development, new technologies, innovation, research, circular economy, sustainability, communication, but also social acceptability of works, the launch of a comparison table regarding the national and european regulatory.

"In the wake of ChemTech and with a look at the new environmental challenges" these are the words of Alfredo Pini at the end of the meeting who continues " today were identified the focal congress themes: innovation and research of the Italian chemical industry, enhancement of a prestigious tradition, preparation to the new environmental challenges of the energy transition, circular economy and development compatible with the sustainable environment" and underlines "A coherent and practicable regulatory framework as well as the promotion of the social acceptability of change and the consequent actions on the territory are the further topics that will be discussed in September with prestigious interlocutors from the public and private sector, in the logic of maximum sharing".

Is **Giuseppe Riva**, Plastics Europe, to confirm how in the last edition we were able to build a dialogue extraordinarily transparent and open between industry and institutions, but it also points to a criticism *"our sector has to fight with backwardness infrastructure, we have to dialogue about how to get out of it."*

Marco Ravazzolo, Confindustria, confirms that *"the chemical industry represents a strategic asset. It is one of the sectors that has made great efforts and investments in the field of sustainability"*, while per **Donatella Giacometti**, Unione Petrolifera, *"it is important to develop the theme of communication for the correct management of products"*.

Confirmed also the joint events of Federchimica with Unione Petrolifera as well as the National Conference organized by the National Federation of Chemists and Physicists that underlines the centrality of the claim "Chemistry, Health and Environment".

The day closes with full satisfaction and with the launch of actions aimed to consolidate and expand the panel of technical, strategic and regulatory opportunities for all stakeholders involved.
